

## Hack for Humanity 2021

### Evaluation Framework for Presentations

Presentations will be evaluated using the below framework.

<b>Hack for Humanity Evaluation Framework</b>	
<b>1. Originality</b>	Provides a fresh approach to the challenge or utilizes innovative methods.
<b>2. Respect for individuals/communities</b>	Aimed at addressing needs as defined by the people who are most impacted, and protects the privacy and rights of individuals.
<b>3. Context</b>	Leverages existing local resources and knowledge. Respects indigenous material and improvised solutions and either builds upon those or considers them in design.
<b>4. Feasibility</b>	Considers logistics of delivery and access, including political, cultural, technological, educational, and infrastructure requirements for delivery and use.
<b>5. Impact</b>	Has the potential to make a significant difference in people's lives. Also considers questions of cost vs benefits, i.e. resources required to produce and deliver solution vs. benefits to individuals.
<b>6. Sustainability</b>	Respects relevant time frame for the context, matching the duration of solution to the likely duration of the need.
<b>7. Partnerships</b>	Considers relevant stakeholders and partners, including local and international as well as private and public. Considers how relevant organizations would be involved in use or delivery.
